VOL. 53, NOS. 1–2

Research papers

Comparison of three techniques to measure unsaturated-zone air permeability at Picatinny Arsenal, NJ
M.S. Olson, F.D. Tillman Jr., J.-W. Choi and J.A. Smith 1
Solutions and verification of a scale-dependent dispersion model
L. Pang and B. Hunt 21
Analytical solutions of contaminant transport from finite one-, two-, and three-dimensional sources in a finite-thickness aquifer
E. Park and H. Zhan 41
The effect of coupled transport phenomena in the Opalinus Clay and implications for radionuclide transport
J.M. Soler 63
Tracer diffusion coefficients in sedimentary rocks: correlation to porosity and hydraulic conductivity
T.B. Boving and P. Grathwohl 85
Penetration of herbicides to groundwater in an unconfined chalk aquifer following normal soil applications
A.C. Johnson, T.J. Besien, C.L. Bhardwaj, A. Dixon, D.C. Gooddy, A.H. Haria and C. White 101
Use of vegetable oil in a pilot-scale denitrifying barrier
W.J. Hunter 119
Time-lapse 3-D seismic imaging of shallow subsurface contaminant flow
J. McKenna, D. Sherlock and B. Evans 133

Erratum

Erratum to "Prediction of mass-transfer coefficient for solute transport in porous media" [J. Contam. Hydrol. 50 (2001) 1–19]
M.A. Maraqa 151

VOL. 53, NOS. 3–4

Special Issue: Natural Attenuation of Organic Pollutants in Groundwater
Guest Editors: Peter Grathwohl and David N. Lerner

Preface 173

Biogeochemical characterisation of a coal tar distillate plume
G.M. Williams, R.W. Pickup, S.F. Thornton, D.N. Lerner, H.E.H. Mallinson, Y. Moore and C. White 175
Assessing the natural attenuation of organic contaminants in aquifers using plume-scale electron and carbon balances: model development with analysis of uncertainty and parameter sensitivity
S.F. Thornton, D.N. Lerner and S.A. Banwart 199

Processes controlling the distribution and natural attenuation of dissolved phenolic compounds in a deep sandstone aquifer
S.F. Thornton, S. Quigley, M.J. Spence, S.A. Banwart, S. Bottrell and D.N. Lerner 233
Microbiological analysis of multi-level borehole samples from a contaminated groundwater system
R.W. Pickup, G. Rhodes, M.L. Alamillo, H.E.H. Mallinson, S.F. Thornton and D.N. Lerner. 269
Isotopic modelling of the significance of bacterial sulphate reduction for phenol attenuation in a contaminated aquifer
M.J. Spence, S.H. Bottrell, S.F. Thornton and D.N. Lerner. 285
Denitrification and phenol degradation in a contaminated aquifer
M.J. Spence, S.H. Bottrell, J.J.W. Higgo, I. Harrison and A.E. Fallick 305
Microcosm studies of microbial degradation in a coal tar distillate plume
I. Harrison, G.M. Williams, J.J.W. Higgo, R.U. Leader, A.W. Kim and D.J. Noy. 319
Reactive transport modeling of processes controlling the distribution and natural attenuation of phenolic compounds in a deep sandstone aquifer
K.U. Mayer, S.G. Benner, E.O. Frind, S.F. Thornton and D.N. Lerner 341
Progression of natural attenuation processes at a crude-oil spill site I. Geochemical evolution of the plume
I.M. Cozzarelli, B.A. Bekins, M.J. Baedecker, G.R. Aiken, R.P. Eganhouse and M.E. Tuccillo . . . 369
Progression of natural attenuation processes at a crude oil spill site: II. Controls on spatial distribution of microbial populations
B.A. Bekins, I.M. Cozzarelli, E.M. Godsy, E. Warren, H.I. Essaid and M.E. Tuccillo 387
Occurrence and attenuation of specific organic compounds in the groundwater plume at a former gasworks site
D. Zamfirescu and P. Grathwohl. 407
An analytical quantification of mass fluxes and natural attenuation rate constants at a former gasworks site
A. Bockelmann, T. Ptak and G. Teutsch. 429
